Afternoon Francesca

I have looked at the submissions in respect of the above. It is noted that these principally relate to controlled waters and as such it is recommended NRW be invited to comment.

The reports states that there exists "an agreed process for the verification of phase-by-phase remediation of the site. This process is described in HFCL (2024a)." It would be useful to see a copy of this document please.

The report also advises that "(RLL (2025) has separately reviewed the risks to human health." ; a copy of this report is sought also.

Human health verification associated with residential build in due course.

Cofion gorau / Kind regards,

Steve
