Planning Obligations Supplementary Planning Guidance

Part One

- 1.0 Introduction
- 2.0 National and Local Policy Context
- 3.0 Procedure
- 4.0 Payments & Bonds
- 5.0 Compliance & Monitoring
- 6.0 Legal Agreements & Administration Fees
- 7.0 Types of Obligation
- 8.0 Piecemeal Development and Under-Development
- 9.0 Outline Planning Applications
- 10.0 Development Costs
- 11.0 Financial Viability
- 12.0 Time-Limited S106 Agreements & Reviews
- 13.0 Dispute Resolution
- 14.0 Renegotiation

Part Two

- 15.0 Affordable Housing
- 16.0 Education
- 17.0 Leisure & Recreation
- 18.0 Transportation
- 19.0 Residential and Employee Travel Plans
- 20.0 Local Labour and Training Initiatives
- 21.0 Payment Details

Glossary of Terms

BCIS – Building Cost Information Service

(Administered by the Royal Institute of Chartered Surveyors it provides an Index identifying the inflationary % increase in the costs of construction year on year)

CIL - Community Infrastructure Levy

A levy that Local Authorities can choose to charge on new developments in their area. The money can be used to support development by funding infrastructure that the City Council, local community and neighbourhoods want

DV - District Valuer

Provides professional property and valuation advice for the public, private and third sector.

LDP - Local Development Plan

The spatial planning strategy for the City Council

PO – Planning Obligation

(A requirement on the developer to do something or pay a financial sum - secured under S106 of the Town and Country Planning Act 1990)

PPW – Planning Policy Wales

(Sets out National Planning Policy which is a material consideration in the determination of planning applications – published by Welsh Government)

RPI – Retail Price Index

(An inflationary index based upon the increase in prices for a typical basket of goods)

SPG – Supplementary Planning Guidance

(A document prepared by the Local Planning Authority to provide more detailed local policy guidance to supplement the policies contained in the adopted Development Plan)

TAN – Technical Advice Note

(A document prepared by Welsh Government to provide more detailed guidance to the policies contained in PPW).

TCPA – Town and Country Planning Act 1990 (as amended)

(Permits Local Authorities to secure planning obligations from developers).

UDP – Newport Unitary Development Plan (1996 – 2011)

(Newport's Development Plan, whose policies and proposals are of first importance in determining planning applications).

UU – Unilateral Undertaking

(A Legal Agreement, offered and signed only by the developer, that binds the developer, upon approval of a planning application, to make a payment or carry out works in kind as specified).

WG – Welsh Government

An executive branch of the devolved government in Wales

WS – Windfall Sites

A site not specifically allocated for development in a development plan, but which unexpectedly becomes available for development during the lifetime of a Development Plan.

PART ONE

1. Introduction

- 1.1 New development can create detrimental effects upon local amenity and infrastructure unless additional, or improved, services and facilities are provided through planning obligations. This Supplementary Planning Guidance (SPG) will identify what, and when, the Local Planning Authority will expect from developers in terms of planning obligations in order to assist the Council in creating sustainable communities that provide social, economic, and environmental benefits.
- 1.2 The infrastructure need generated by a proposed development is a material consideration in the determination of a planning application. The capacity of existing infrastructure may be exceeded as a consequence of new development, generating a need for new infrastructure or facilities. The use of planning obligations may be appropriate to require developers to make contributions for the provision of infrastructure to support proposed development.
- 1.3 A planning obligation is a legally binding agreement, which runs with the title of the land. It requires the developer to either carry out certain works (known as a contribution in kind), or to contribute financially towards the provision of measures that will mitigate the detrimental impacts of their development. Where a developer fails to show they can adequately mitigate a developments impact, it is likely the planning permission will be refused.
- 1.4 The Council does not propose to formulate a blanket approach to planning obligations, as each planning application will be considered on its own merits. Obligations relating to matters not covered by this SPG may be sought where there is sufficient robust evidence to justify such obligations. This guidance aims to provide clarity for interested parties and it will represent a material consideration in the determination of relevant planning applications and appeals.
- 1.5 Extant planning permissions, granted before this SPG is adopted, will come within the terms and conditions of this new policy, should an application for renewal be submitted. Likewise, material changes in planning circumstances will be considered regarding Section 73 applications, the practical effect of which is to grant a fresh consent.

2. National and Local Policy Context

National Planning Policy

- 2.1 Section 106 of the Town and Country Planning Act (TCPA) 1990, as amended by Section 12 of the Planning and Compensation Act (1991), is the legislative framework for planning obligations. Further guidance on the provisions of Section 106 can be found in the Planning Act (2008) and the associated Community Infrastructure Regulations (2010 & 2011). Any obligation must meet the following three tests:
 - 1) Necessary to make the development acceptable in planning terms;
 - 2) Directly related to the development; and
 - 3) Fairly and reasonably related in scale and kind to the development.

2.2 Planning Policy Wales (PPW) (February 2011) identifies that:

- Planning obligations are useful arrangements to overcome obstacles which may otherwise prevent planning permission from being granted.
- Contributions may be used to offset negative consequences, help meet local needs, or to secure benefits which will make development more sustainable.
- Arrangements should be fair to both the developer and the community.
- The process should be as transparent as possible.
- Parties should work for an early agreement to avoid unnecessary delay in the planning process.
- Unacceptable development should never be allowed because of unrelated benefits.
- Acceptable development should never be refused simply because an applicant is unwilling to offer unrelated benefits.
- If there is a choice between imposing a condition and entering into a planning obligation, the imposition of a condition is preferable.

2.3 The Planning and Compulsory Purchase Act 2004 has provided the option to modify Section 106 of the TCPA through secondary legislation.

Local Planning Policy

2.4 The Council adopted the Unitary Development Plan (1996 – 2011) in May 2006. Whilst new development proposals should have regard to all relevant policies of the plan the following policy is particularly pertinent in relation to planning obligations and new developments.

2.5. Policy SP11 (Planning Obligations) states:

“Where it is relevant, necessary, and directly related in scale and kind to a development proposal, benefits for the community will be sought. Such benefits could include educational, community, and leisure facilities; land for employment and/or retail purposes; affordable housing; public transport investment; highway investment; other infrastructure provision; additional landscaping; layout and/or design measures to offset the impact of development on the environment; open space provision and habitat creation.”

2.6 Newport’s Community Strategy 2010 – 2020 was published in January 2011 to update the previous version. The Community Strategy has a vision for improving Newport socially, environmentally and economically.

2.7 The purpose of planning obligations is to overcome the negative impacts that new development can place upon the local community. Therefore planning obligations have a key role in ensuring positive planning so that new development supports and enhances legitimate social, environmental and economic requirements in order to create sustainable local communities.

3. Procedure

- 3.1 In order that the implementation of this SPG does not unduly affect the statutory period for consideration of planning applications, it is expected that all necessary S106 related documents be submitted at the time the planning application is lodged.
- 3.2 If an application for residential development is to be approved the applicant must submit with the planning application:
- Proof of Title – proof of ownership of all the property and/or land affected by the application site edged red. Because planning obligations run with the land, all owners, lessees and mortgagees must be signatories;
 - Draft S106 Heads of Terms;
 - Any valuation to prove eligibility for reduced contributions, accompanied by information detailing how costs were derived;
 - All other requirements outlined by the application form checklist;
 - Details of the solicitor that will be handling the case;
- 3.3 If an application is submitted with sufficient information to satisfy the validation process, but fails to provide any necessary information, subsequently required by the Council as necessary to the determination of the application, this will normally result in the refusal of an application.

4. Payments and Bonds

- 4.1 The timeframe for payment of contributions will be subject to negotiation between the parties. All deferred payments will be index linked from the date of the agreement, up to the date of payment
- 4.2 Overdue financial obligations will be subject to Late Payment Interest to be included in the legal agreement at a rate of 2% above National Westminster Bank PLC base rate, payable from the date on which the amount was due until the date it is received by the Council. Where it is deemed necessary, the Council will require the developer to pay a bond to ensure delivery of obligations.

5. Compliance and Monitoring

- 5.1 Compliance with the obligations contained within planning legal agreements remains the responsibility of the landowner, or their chosen development representative(s). The Planning Contributions Manager provides proactive monitoring of agreements, to assist in ensuring that obligations are met in a timely manner by all parties. Breaches may result in a legal injunction and/or debt recovery proceedings.
- 5.2 Financial contributions which remain unspent by the Council at the end of the time period specified in the legal agreement will, upon the specific request of the payee, be returned to the payee with any interest accrued, unless otherwise agreed in writing.
- 5.3 Planning Obligations will be monitored by the Planning Contributions Manager to ensure that all obligations are complied with by both the developer and the Council. Regular monitoring reports will be produced that will provide details of agreements entered into, financial contributions received, and the completion of schemes that have been funded through financial contributions in whole or in part.

6. Legal Agreements and Administration Fees

- 6.1 Planning Obligations can be contained in Unilateral Undertakings or Agreements. Unilateral Undertakings are usually drafted by the developer's solicitors, whereas Agreements are usually drafted by the Council's in house solicitors (but there is no general objection to developers arranging for their own solicitors to draft the Agreement if preferred). Either way the developers will be responsible for the Council's legal costs incurred in relation to the process of drafting, approving and completing any Deed of Obligation, including costs of title investigation which is necessary to ensure the correct parties enter into the Deed. **The legal agreement shall be signed within six months of the resolution to grant permission. If not agreed within this time period, or cannot be signed imminently, the application will be reconsidered by either the Planning Committee or under delegated officer powers and refused.**
- 6.2 A 3% Administration Fee or 15% of the application fee (whichever is the greater), will be charged for the negotiation and administration of the S106 agreement and ongoing compliance monitoring. Staged payments will be considered in exceptional circumstances e.g. build programmes greater than 10 years. As such, payments will be linked to the phasing of planning permissions.
- 6.3 In those cases relating to large scale strategic developments which involve significant planning obligation contributions, it may be appropriate to negotiate an appropriate fee based on the amount of necessary officer involvement rather than the above formula, to provide the developer with a degree of certainty about the amount of fee required.
- 6.4 Applicants will be expected to contractually agree within the legal agreement that they will pay the Administration Fee at the same time as payment of the Legal Fees i.e. at the date of signing of the legal agreement. These fees are non-refundable.

7. Types of Obligations

- 7.1 The Local Planning Authority considers that development costs incurred in delivering sustainable development is to be expected, and therefore, a development site should still be able to contribute towards, where appropriate, the following planning obligations:
- Affordable Housing Provision
 - Canal works
 - Community Facilities Provision – e.g. improvements to libraries, community halls
 - Community Woodland Initiatives
 - Education Provision
 - Flood Defences
 - Habitat Conservation & Improvement
 - Highway Infrastructure Works
 - Landscape Improvements
 - Leisure Facilities – including formal and informal play space, sports provision, and associated commuted maintenance payments
 - Local Labour & Training Initiatives
 - Pedestrian, Cycle and Public Transport Improvements
 - Provision or Improvement of Public Realm
 - Travel Plans
- 7.2 The above are listed in alphabetical order and not in order of priority. The list should be regarded as illustrative (and not exhaustive) of the types of contributions that might be necessary depending on individual circumstances.

- 7.3 Once sufficient infrastructure to enable a scheme to proceed has been made available, the priority given to the different types of planning obligation will be at the discretion of the Local Planning Authority, and dependent upon the characteristics and location of individual sites. However, in order to provide a balanced sustainable development in planning terms, the Council will endeavour to ensure that S106 contributions equitably serve the planning objectives. The Planning Officer's report to Committee will provide the justification for the chosen priorities.

8. Piecemeal Development and Under-Development

- 8.1 Where development forms part of a larger site that, in its entirety, would meet or is capable of meeting any defined threshold, the requirement for the obligation will still apply. Under such circumstances, each subdivided plot will be required to provide contribution towards the relevant obligation proportionate to its size and relative to its impact. Where the new development involves more than one developer, the Council may seek joint contributions from developers to mitigate combined impacts.
- 8.2 Where developments are proposed which fall short of the threshold by up to 20%, it will be necessary for the Council to consider whether the proposal constitutes deliberate under-development of the site to avoid the planning obligation requirement. As a general rule, a minimum density of 30 dwellings per hectare will be considered appropriate. Where site specific constraints make lower densities necessary, this will be considered by the Council on a site-by-site basis.

9. Outline Planning Applications

- 9.1 As a general rule, when determining an outline planning application, a legal agreement will be required to provide for the principle of specific obligations, with the value and details to be determined when the full details of the scheme are known, either via the associated Reserved Matters application or by any subsequent Full application. The S106 agreement at outline stage will, therefore, be formula based, so that the exact contributions will be dependent upon floor space or the number and size of dwellings.

10. Development Costs

- 10.1 Developers/Owners must ensure "due diligence" in the acquisition of development sites. This is usually done by means of an "environmental audit" and basic site investigation to identify any liabilities and development constraints before purchase of the site. Many of the development sites in Newport are 'brownfield' sites and, therefore, any abnormal costs should be reflected in the valuation and purchase price of the site.
- 10.2 In the event that a developer considers that abnormal development costs will be incurred, it will be the responsibility of the applicant to demonstrate how the costs have been derived. A site investigation report, remediation statement, detailed foundation drawings and calculations of how the abnormal costs have been derived must be submitted with the application.

11. Financial Viability

- 11.1 Certain proposals may be eligible for discounted or reduced contributions, if it can be proven that the level of contribution required will jeopardise a proposal's viability. This is most likely to be the case on previously developed land, and the development of the site is considered to be a significant regeneration benefit.

- 11.2 It is expected that an 'open book' approach to negotiations will be supported by developers/owners, in order that planning obligations can be secured at appropriate levels to mitigate the impact of the development, whilst ensuring that the development remains viable. Any financial information supplied by a developer as part of this 'open book' process will be considered as being 'commercial information supplied in confidence'.
- 11.3 All 'open book' financial appraisals will be scrutinised by the Council, which may lead to additional questions being asked of the applicant. Developers will be expected to prove to the Council that a scheme is financial unviable. The Council will seek verification of these details from both the Council's Estates Section and the Three Dragons Development Appraisal Toolkit. Where the parties are unable to agree, the Council will instruct the District Valuer to undertake an independent study, at cost to the applicant.
- 11.4 Irrespective of the outcome of a viability appraisal, it may be necessary for the Council to secure a certain level of developer contributions, in order to mitigate the impact of the development. Such a circumstance could be where a failure to make some provision for certain infrastructure items would make the development unacceptable in planning terms, contrary to policy and an unacceptable burden. This will be assessed on a case-by-case basis. In such circumstances, failure to secure the contributions, deemed necessary to support the proposal, could result in a recommendation of refusal.
- 11.5 It is important to understand the principle that a planning obligation is generally necessary to make a proposed development acceptable in planning terms. A scheme's non-viability, although a material consideration, is not a sufficient reason in itself for accepting reduced contributions. Reduced contributions would, however, be considered for developments that provide regeneration benefits and/or additional planning benefits to the City.

12. Time Limited S106 Agreements & Reviews

- 12.1 In exceptional circumstances, where the Council accepts that the scheme is unable to make any or all the required contributions, due to proven viability difficulty, it may, where applicable, impose a planning condition or obligation, setting a limited timeframe within which the development must be substantially completed.
- 12.2 Where reductions are justified, the Council may require developers to agree to timely review points in their section 106 agreement to take account of any subsequent change in the economy, which may make additional planning obligations feasible.
- 12.3 Please note that any future Renewal Application of an extant permission or new Full Application, will also result in all planning contributions being re-assessed, based on local and national policy at the date of registration of the planning application.

13. Dispute Resolution

- 13.1 Where there is a dispute between the Council and landowner, applicant and/or developer, and where all parties agree, the District Valuer (DV) will be appointed to undertake an independent assessment of scheme viability and the ability to achieve the planning obligations that are in dispute. The DV appointment will be paid for by the applicant/owner/developer. All key stakeholders must endorse the process, play an active role and be willing to submit appropriate information to enable the appraisal to be undertaken. The role of the DV is to validate factual information to assist in the resolution of issues. Both parties should accept the DV's decision on the determination of viability. However, the DV would not act as an arbitrator. Responsibility remains with the Local Authority and landowner, applicant and/or developer to resolve the dispute.

- 13.2 A Statement of Common Ground must be jointly produced to establish project elements, costs and assumptions that can be agreed between both parties at the outset of the DV's involvement. Any financial assessment can then focus on addressing the specific areas of disagreement. To address commercially sensitive information, a confidentiality agreement can be drawn-up to ensure that any sensitive financial information is made available only to the assessor and not shared directly with the Local Authority or any other third party. Only the findings of the assessor need to be shared across all parties, based upon the information supplied to them and their professional opinion on its accuracy. However, enough information must be presented to ensure the decision making process can continue and to see the effect the decision may have on the scheme viability and also give confidence to determine the need to depart from policy.
- 13.3 Either party may, of course, decline to participate. However, this could be perceived as obstructing a potential resolution and may compromise their position at a later date in the decision making process.

14. Renegotiation

- 14.1 Where a consented development can no longer deliver the agreed planning contributions, for reasons of non-viability (subject to verification by the developer/owner in accordance with the procedures identified above), the Council is entitled to take a view on whether there are benefits to the scheme that justify flexibility. The Council will consider whether the development is of sufficiently high priority to warrant renegotiation of planning obligations to restore viability and allow delivery, and whether any re-negotiated development will continue to match the Council's local policies and priorities. For example, reduced contributions would be considered for developments that provide regeneration benefits and/or additional planning benefits to the City.

PART TWO

15. Affordable Housing

Policy Background

- 15.1 The Welsh Government (WG) published Technical Advice Note 2: Planning and Affordable Housing (TAN2) in June 2006. TAN2 defines affordable housing as 'housing where there are secure mechanisms in place to ensure that it is accessible to those who cannot afford market housing, both on first occupation and for subsequent occupiers'. TAN2 identifies that affordable housing includes social rented housing (e.g. provided by local authorities and registered social landlords) and intermediate housing (e.g. Homebuy), where prices or rents are above those of social rent but below market housing prices and rents.
- 15.2 Policy H5 (Housing Mix and Affordable Housing) of Newport's Adopted Unitary Development Plan (1996 -2011) identifies that the Council will seek to negotiate appropriate elements of affordable housing on new developments.
- 15.3 Planning Policy Wales (February 2011) states that where development plan policies identify that affordable housing, or other developer contributions, are required on specific sites, then this will be a material consideration in determining relevant planning applications.
- 15.4 The Council will expect applicants to have taken into account the likely cost of providing the affordable housing when purchasing land subject to alternative use values. Within this calculation the applicant can assume that a proportion of affordable housing provision (i.e. up to 30% of a larger open market development) will be exempt from payment towards leisure and education planning obligations. This is in accordance with the Community Infrastructure Regulations (2010 & 2011).
- 15.5 The Council will not allow a reduced affordable housing contribution if a developer has paid too much for a site by neglecting to consider the cost of providing the affordable housing. The Council will require that land values agreed take into account the full provision of affordable housing in line with policy. The assumption should always be that public subsidy would not be available.
- 15.6 However, any applicant who believes that 30% will be inappropriate on any particular site will need to demonstrate that fact to the Council. The applicant will also be required to meet the costs of independently assessing the scheme on behalf of the Council. Furthermore, such discussions will need to take place as early in the process as possible, to allow the Council to explore other funding routes. Should this be necessary, the affordable homes will need to be delivered in accordance with the relevant funding requirements current at the date of entering into contract for the construction of the affordable housing units.
- 15.7 The viability assessment will include assessments of anticipated costs against anticipated income for the site, to produce a residual land value assuming a developer profit of 17%. This land value will then be measured against any alternative use values to assess whether the site will still come forward for development.

Trigger for Obligation

- 15.8 Up to 30% affordable housing will be sought on appropriate sites that meet the relevant thresholds identified in the Affordable Housing SPG. Affordable housing should normally be provided on-site in order to contribute to socially mixed communities, though in exceptional circumstances it may be provided off-site or a commuted sum paid in lieu.

- 15.9 Registered Social Landlords are key partners in the process and the Council will involve them at an early stage in negotiations with developers.
- 15.10 **Detailed guidance** on the type and provision of affordable housing in Newport can be found in **Affordable Housing Supplementary Planning Guidance**. Further information in relation to affordable housing provision, Housing Market Assessments, and waiting lists can be obtained from:

---	----	---

16. Education

Policy Background

- 16.1 The justification for requiring financial or in-kind contributions in respect to educational facilities is set out in Welsh Office Circular 13/97 (Planning Obligations). Paragraph A4 identifies that Section 106(2) of the Town and Country Planning Act 1990 provides for payments of money to be made, either of a specific amount or by reference to a formula. Paragraph B10 states that provision of educational facilities may be acceptable provided that such facilities are directly related to the development proposal, the need for them arises from its implementation, and they are related in scale and kind.
- 16.2 Paragraph 7.34 of the Adopted Newport Unitary Development Plan (1996 -2011) states that in areas identified for new housing, the Council will seek contributions towards the cost of additional education provision generated as a result of the development.
- 16.3 Contributions may be used for:
- provision of new schools
 - provision of new classrooms
 - improvements and refurbishment of existing facilities to provide additional capacity
 - provision of additional resources or improvements to existing resources necessitated by the additional demand.
- 16.4 Negotiations with developers on planning agreements will include:
- the project(s) to which their contributions may be used
 - the timing of the payment of agreed contributions; on large sites payments may be phased by agreement with the authority
 - when contributions will be spent; this will normally be within 5 years of receipt of the final payment.

Trigger for Obligation

- 16.5 A contribution will be sought from a developer if the number of dwellings to be built is 5 or more and where:
- (a) the pupils potentially arising from the development will cause the capacity of any catchment area of the secondary school to be exceeded; and/or

- (b) the pupils potentially arising from the development will cause the capacity of any catchment area primary school, within a 2 mile walking distance of the development, to be exceeded; and/or
- (c) there is surplus capacity in schools to accommodate some or all of the pupils probably arising from the development, but refurbishment is required to make those places suitable for use.

In both cases (a) and (b) the contribution requested will relate to the number of pupils expected to be generated by the proposed development.

The only form of exempt dwelling will be:

- bed-sits/studio apartments and 1 bedroom dwellings
- sheltered/elderly person housing
- care homes, rest homes and nursing homes;
- hostels; student accommodation (including residential schools, colleges or training centres)

16.6 The Council will take account of school capacity when calculating financial contributions towards education facilities. The school capacity is published in the Newport City Council Schools Organisation Plan. However, for the purposes of planning contributions, the pupil capacity will be calculated net of any capacity that has been achieved through using temporary accommodation for 3 years or less.

16.7 Where large scale development generates sufficient pupil numbers to justify a new primary or secondary school, this will be required to be provided within the development. If not physically possible to accommodate the facility on site, the developer will be required to make an equivalent financial contribution (e.g. land value and building costs) towards its off-site provision.

Education Contribution Formula

16.8 Firstly calculate the number of pupils in each age range that are expected to arise from each type of dwelling in the development. (Please note that figures will be rounded up or down to the nearest whole figure e.g. 0.49 or less will equal 0 (zero), whilst 0.5 or more will equal 1 (one))

<u>Proposed Dwelling Type*</u>	<u>Nursery</u> <u>No. of</u> <u>Dwellings x</u>	<u>Primary</u> <u>No. of</u> <u>Dwellings x</u>	<u>Secondary</u> <u>No. of</u> <u>Dwellings x</u>
Houses: 2+ beds	0.02	0.31	0.22
Flats and apartments: 2+ beds	0.02	0.07	0.05

*Where an outline planning application is submitted that does not identify the proposed mix or total number of units then as a starting point for negotiation the presumption will be that the development would be all for 2+ bed houses, and that development will be at a gross density of 35 dwellings per hectare (or pro rata).

Total number of nursery pupils generated..... **A**
 Total number of primary school pupils generated..... **B**
 Total number of secondary school pupils generated..... **C**

16.9 Calculate the requirement for increased capacity taking into account capacity and “number on role” (NOR).

a. If the NOR is **less than** identified capacity

Calculate the number of additional pupils by which the school NOR exceeds the published “capacity” once the number of pupils generated are added to the school role.

Nursery: **D = NOR + A – capacity**
 Primary: **E = NOR + B – capacity**
 Secondary: **F = NOR + C – capacity**

Or

b. If the NOR is already **greater than** identified capacity

Use the number of additional pupils generated by the development.

Nursery: **D = A**
 Primary: **E = B**
 Secondary: **F = C**

Then

**Section 106 Contribution = ([D + E] x Nursery/Primary Cost Multiplier)
 + (F x Secondary Cost Multiplier) + (F x 0.2 x Post 16 Cost Multiplier)**

16.11 The 2011/12 Cost Multipliers are:

2011/12 Cost Multipliers for Additional Places
Nursery and Primary: £16,115
Secondary: £15,302
Post 16: £16,427

The average take up of post 16 school places in Newport is 0.2 of Secondary School places. The Post 16 figure of **£16,427** should therefore be multiplied by 0.2 to calculate the relevant contributions towards post 16 education.

The primary cost multiplier is based on actual costs of developing a primary school in Newport.

The costs of developing a secondary school in Newport, are based on actual costs of developing secondary schools in other local authorities in Wales, and the estimated average cost figure for building a new secondary school in Newport.

All cost multipliers will be reviewed and updated annually.

Example:

A development of:

- 500 dwellings (100 one-bedroom flats, 100 two-bedroom flats and 300 three or four bedroom houses)
- In the catchment of nursery X (capacity 45, current number on role 45), primary school Y (capacity 210; current number on role 208) and secondary school Z (capacity [1,500 – 40 temporary accommodation] = 1,460; current number on role 1,467).

$$\text{Nursery pupils} = (100 \times 0.00) + (100 \times 0.02) + (300 \times 0.02) = 8 \text{ (A)}$$

$$\text{Primary pupils} = (100 \times 0.00) + (100 \times 0.07) + (300 \times 0.31) = 100 \text{ (B)}$$

$$\text{Secondary pupils} = (100 \times 0.00) + (100 \times 0.05) + (300 \times 0.22) = 71 \text{ (C)}$$

Nursery school is at capacity thus:

$$\mathbf{D = 8(A)}$$

Primary school is below capacity thus:

$$\mathbf{E = 208 + 100(B) - 210 = 98}$$

Secondary school above capacity thus:

$$\mathbf{F = 71(C)}$$

$$\begin{aligned} \text{Contribution} &= (106^{\text{D\&E}} \times \pounds 16,115) + (71^{\text{F}} \times \pounds 15,302) + (71 \times 0.2^{\text{Post 16}} \times \pounds 16,427) \\ &= \pounds 1,708,190 + \pounds 1,086,442 + \pounds 233,263 \\ &= \pounds \mathbf{3,027,895} \end{aligned}$$

17. Leisure & Recreation

Policy Background

17.1 Planning Policy Wales (June 2010) identifies that the Assembly Government's main planning objective is to promote a more sustainable pattern of development by creating and maintaining networks of facilities and open spaces, particularly within urban areas. In addition, local planning authorities may be justified in seeking Section 106 contributions to contribute to the maintenance of facilities and open space, and to meet the needs of new communities, and ensure that standards of provision are met.

17.2 Policy CF4 (Open Space Standards) of the Adopted Newport Unitary Development Plan (1996-2011) states that provision of open space at a minimum standard of 2.4 hectares per 1000 population will be sought on all new housing developments with the developer making a requisite commuted sum towards future maintenance.

Trigger for Obligation

17.3 A contribution will be sought from a developer if the number of dwellings to be built is 5 or more. A collective number of small sites would place the same level of pressure on resources as a large individual site. Contributions will be spent in the associated ward, or if more appropriate, spent in the local vicinity.

17.4 A financial contribution in lieu of on site provision will be sought for developments between 5 and 15 dwellings and spent in the associated ward, or if more appropriate, spent in the local vicinity. For developments of 15 or more dwellings the preference is for provision to be situated on site. However, in exceptional circumstances, a financial contribution, or partial financial contribution, will be considered.

Maintenance Payments

17.5 Where on-site provision is agreed, an additional maintenance payment covering a period of 20 years will be required. The level of maintenance payments are regularly updated by the Council in accordance with current Council contracts.

17.6 For clarity please note that Care Homes, Rest Homes and Nursing Homes are exempt from recreational obligations.

Further Information

17.7 Further information and details on types of equipment and maintenance costs can be found in the Council's Outdoor Play Space Supplementary Planning Guidance. Detailed requests can be directed to:

18. Transportation

Highway & Infrastructure Provision

Policy Background

18.1 Welsh Office Circular 13/97 (Planning Obligations) identifies in Paragraph B10 that appropriate contributions may be sought towards new access roads, improved junction layouts, extra car parking facilities, new/improved rail/bus stations, park and ride schemes, improved bus services, and improved measures for cyclists and pedestrians both on, and where necessary off, the development site.

18.2 Additionally, TAN 18 (Transport) states that planning authorities may use planning obligations to secure improvements in roads, cycling and public transport, whether as a result of a proposal on its own or cumulatively with other proposals and where such improvements would be likely to influence travel patterns, either on their own or as part of a package of measures. It also identifies that pooled contributions towards infrastructure capacity issues may be appropriate when a number of individual developments create a combined need or an unacceptable cumulative impact

Trigger for Obligation

18.3 The Local Planning Authority will require contributions from any development, regardless of size or type, where there is a requirement to improve existing, or construct new, highway infrastructure, either in order to provide safe access to a new development, or, as a result of the additional traffic impact associated with the development. This contribution would be required in addition to contributions to other travel modes such as public transport provision, cycle routes, or footpaths.

Further Information

18.4 Further information on highway design requirements, Section 278 Agreements (1980 Highways Act), and car parking standards can be obtained from:

19. Residential and Employee Travel Plans

Policy Background

19.1 PPW (2010) identifies that when determining a planning application for development that has transport implications, local planning authorities should take into account the willingness of a developer to promote travel by public transport, walking or cycling, or to provide infrastructure or measures to manage traffic, to overcome transport objections to the proposed development.

19.2 PPW (2010) also states that planning obligations may also be used in appropriate circumstances to secure off-site improvements in public transport, walking and cycling, where such measures would be likely to influence travel patterns to and from the site involved.

Trigger for Obligation

19.3 Developers will be required to produce a Travel Plan where Traffic Impact Assessments (TIAs) identify that a proposed development could have a detrimental impact upon travel movements on the existing highway network. The Travel Plan will need to identify what measures will be implemented by the developer to overcome any detrimental impact through promoting sustainable integrated transport solutions that will reduce the reliance on the private car. The objective of the travel plan will be to achieve at least a 10% modal shift

in travel behaviour of the occupiers of the site. The Travel Plan obligation will require occupiers of development to undertake a staff/resident travel survey and implement and monitor a staff/resident travel plan. The Travel Plan should include the provision of up to date information about public transport services, timetables, and opportunities for car sharing (e.g. via a car share website). However additional measures may also be sought, including provision of designated car share parking spaces, discount vouchers/passes for public transport, or financial contributions toward shuttle buses and park and ride schemes.

20. Local Labour and Training Initiatives

Policy Background

20.1 PPW (2010) identifies that all communities need new employment opportunities. As a result Newport City Council has produced a Construction Employment Charter (CEC). The CEC's purpose is to help secure the social and physical regeneration of the City for the lasting benefit of local communities through creating a genuine partnership between the public sector, the private sector and the community. The CEC invites construction employers to use their best endeavours to recruit locally skilled and locally trained people on construction projects.

Trigger for Obligation

20.2 The Charter is a voluntary code of practice, and developers are encouraged to make a commitment to the following principles;:

- to inform the Charter Manager of new employment opportunities within Newport and to identify whether those jobs can be filled by suitably experienced local unemployed people;
- to use local companies as suppliers where appropriate.
- to adopt the Charter principles, including equal opportunities, and health and safety, and, also provide a commitment to employee and apprentice development and training.

20.3 It is considered that all construction related developments may be able to offer employment opportunities, and consequently all developers are asked to sign up to the Construction Employment Charter.

21 Payment Details

Financial contributions will be paid to Newport City Council. Please send payment(s) to:

Planning Contributions Manager
Newport City Council
Regeneration and Regulatory Services
Development Services
Civic Centre
Newport
NP20 4UR

You must state the planning application number and development address

- Please make **cheques** payable to Newport City Council
- For **BACS transfers**, please quote S106 then your planning application number in the format 'Conin/--/----'

Council Bank Details:

Alliance & Leicester Commercial Bank PLC
Sort Code: 72-00-00
Account Code: 05070406
Newport City Council Collection Account

When making a payment by BACS, please inform the Planning Contributions Manager in advance of the payment date with the following details:

- Planning permission reference
- Clauses and Obligations being met
- Name of payee
- The value of the payment

Notification can be made by telephone 01633 232801 or electronically to:
