Hello Marnie,

I have considered this application in relation to section 7.0, Figure 4 - 'Checklist for protected/priority Species Surveys' set out in the Wildlife and Development SPG, which sets out the criteria we use for deciding when a bat survey is needed. The nature and location of these buildings and the works proposed to them do not suggest that there is a reasonable likelihood of an impact upon roosting bats, so I would not ask for a bat survey on this occasion. However we can never totally rule out the possibility of bat presence, so we should attach our Bat Advisory Note to any consent granted.

My only other concern is the impact of the new buildings upon the line of trees along the motorway embankment. However I note the comment from the Arboricultural Officer that '... the risk to boundary trees is minimal and therefore there are no objections on arboricultural grounds.' As long as these trees are not likely to be significantly impacted, I have no further objection.

The proposed biodiversity enhancement measures shown in the Proposed Elevations plans are acceptable, subject to implementation as shown.

Matt

Bat Advisory Note

Bats often roost in houses and other buildings, and work on these buildings may disturb a bat roost. All bats and their roosts are protected against disturbance under UK and European legislation. If works are planned on a building in which bats are roosting, Natural Resources Wales (NRW) must be contacted for advice.

If work has already commenced and bats are found, or if any evidence that bats are using the site as a roost is found, work should cease and NRW should be contacted immediately.

Where there is a likelihood that bats are present, or where bats are found to be present, a suitably qualified and experienced ecological consultant should be contracted to provide an assessment of the impact of the proposed works, and undertake bat surveys if necessary.

Where bats or their roosts are present, no works of site clearance, demolition or construction should take place unless a licence to disturb these species and/or their roosts has been granted in accordance with the relevant legislation. Otherwise, a prosecution may result.

NRW can be contacted at:-

Natural Resources Wales, Tŷ Cambria, 29 Newport Road, Cardiff CF24 0TP, 0300 065 3000

Bat Conservation Trust can be contacted at:-
