Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	<p>I'm objecting to this application because of the effect it will have on the on street parking situation on Bryngwyn Road.</p> <p>This application would make 6 flats which if some are occupied by working residents with partners could produce 12 cars.</p> <p>There is only parking space for 2 cars on the property so it is possible that there could be up to 10 cars looking for on street parking.</p> <p>At moment there is no residents only parking so anyone can use the road for parking. There are callers at the surgery, the dentist, those going on holiday at the railway station who leave their cars for a couple of weeks, parents picking up school children. At the present there is often bumper to bumper parking the whole length of the road. Trying to find a parking space for many residents is a nightmare and often people are forced to park a long way from their homes.</p>

Kind regards
