Hi Harpreet,

Yes this is better. Have they said what finish it would be? Painted or left as timber?

Thanks,

### **Laura Smith**

Hi Laura,

The applicant has come back suggesting a 1.2m high picket tanalised timber fence (image below) and confirmed that the existing low brick wall is proposed to be retained.

Please can you confirm if this would be acceptable.

Kind regards

**Subject:** Re: 24/1027 48 Mill Street

Thanks Harpreet.

My concern is that this would be a closed, 1.8m fence situated on a prominent corner within the Caerleon conservation area. Currently, the corner is open to visuals along Backhall Street, with the two large trees being a significant feature of this site. This character would be diminished if a fence of this height and style is erected to enclose the green space. I would be open to

alternative designs, such as shorter, more open fencing, similar to a picket fence. In the past, there has been a shorter, more open fencing around this area. Having this would protect the site from public use, whilst retaining the openness of the existing street scene. It is also slightly more traditional in design and thus better suited to a historic area. I would advise that the applicant reconsiders overall design and height of the fence in this location.

It would also be good for the applicant to clarify whether the existing low brick is proposed to be retained.

Many thanks,

**Laura Smith**

They confirmed that they owned the green patch and that they receive a lot of littering and dog foul. The fence would be an obstruction.

Hi Laura,

I visited the site this week and have attached some photos. However, while the shed is clearly retrospective, the fence is not yet up. After speaking with the applicant, it seems that they are applying to erect the fence around the green patch.
