In summary, whilst a larger replacement dwelling could be supported in principle the scheme proposed significantly exceeds the 30% threshold set out in Policy H12 and also extends the existing residential curtilage into the adjacent field, which would erode the rural character and appearance of the countryside area. Given the location, it may be possible to justify a replacement dwelling with a volumetric increase greater than 30%, however this would need to be of high quality design and materials in my view and would need to be contained to the existing residential curtilage.
