Subject: 15/0270 - Land to South of and including Glebelands Stadium, St Julians

Hi Vicky,

15/0270 – Partial discharge of condition 10 (route of construction traffic) of planning permission 00/0768 for replacement school and residential development at the Glebelands, St Julians

Land to South of and including Glebelands Stadium, Bank Street, Newport

I note that the applicant has e-mailed agreement to use the Turner Street route (Caerleon Road - Turner Street – Herbert Road) for the construction traffic with only abnormal loads using the East Usk Road route, which is acceptable. Can the applicant please update the delivery plan to reflect this and also include a drawing showing the Turner Street route and the alternative route for abnormal loads as all supporting information with this application still shows that they plan to use the East Usk Road route.

Thanks,
Sarah
