

APPLICATION NUMBER: 25/0474

PROPOSAL: MAIZE CLAMP

SITE: Church Farm Wilcrick Lane Magor Newport NP26 3DA

APPLICATION TYPE: Full

The proposal is for 4m high concrete panels. The roadside hedge is an important part of visual amenity mitigation and will need to be retained. An adequate off-set from the hedge is required.

There are no mitigation proposals but this is linked to application 25/0486 for a new livestock building which has sufficient new planting to meet LDP GP5 for a proportionate landscape scheme for both applications.
