Subject: 24/0467

Afternoon Geraint

I have looked at the submissions and would like to comment as follows:

The Landscape management Plan is noted. We are keen that opportunities to maximise the air quality benefits from green infrastructure are taken as some species can actually be detrimental to air quality. In view of this please can the applicant confirm that species used within new plantings/landscaping will be air quality positive ? The attached paper may assist them in this submission.

Kind Regards
Steve
