Subject: Objection to planning application 26/0456

FAO Vicky Quinn

I write in connection to the above application at 51 Tennyson Road NP29 8HX to which I object.

I am care giver to my elder mother who lives at No 45, she has a disabled badge due to mobility issues and relied on myself and my brother to transport her for medical appointments, shopping and general assistance with her home and garden.

I object on the grounds on the impact to parking in the area, even this weekend before any of this is approved i had to park the next street over walk to my mothers to get her ready then get her to sit outside her house in the sun whilst I went to retrieve the car park it on the main roadway blocking everyone else in order to just get my mother in the car. This was repeated on return and is just not acceptable in this day and age. I worry that it will only add to the existing problem plus how does this impact emergency services access.

People in Tennyson Road already have to park in surrounding area which causes residents in neighbouring streets do the same.

Please do not grant this application. I have attached a copy of her disabled badge to aid the objection.
