Description of Proposed Works

Please describe the proposals to alter, extend or demolish the listed building(s)

Demolition of Sluice Gate and footbridge structure adjacent and part connected to Aqueduct over Malpas Brook, together with all associated mechanical equipment, support brackets, gates and ancillary components, will be dismantled and removed from site. The existing concrete T-beam fixed into the Aqueduct will be cut flat and flush with the face of the historic structure, leaving the embedded portion of the T-beam in situ within the Aqueduct structure. All connecting elements, including the handrail stanchions and bridge deck, will be removed, and holes filled as appropriate to avoid undue water penetration, etc. A chicken wire fence (as existing) will be installed across the existing opening to close the area off to the public.
