Subject: RE: Herbert road

Hi Mark

I was looking at the planning application on the land next to us on Herbert Road last night and would like to raise a few concerns.

In the application point 8.7.2 states that our site is vacant, this is not true we have continued to use the site for all our painting of structural steel, we have now been able to lease out the site to a shot blasting and painting company

On a 3 to 5 year lease

Also in one part it goes on about installing retaining walls between 600 and 1500 mm high to the boundary of our site then building up the level of the land behind, will this increase the risk of us flooding from surface water or a deluge of rain on our site.

Hope this makes sense and if possible can you please contact me so we can discuss the issues.

Regards

Jeff
