Subject: RE: 25/0955

Hi Lydia,

I have considered this application in relation to section 7.0, Figure 4 - '*Checklist for protected/priority Species Surveys*' set out in the Wildlife and Development SPG, which sets out the criteria we use for deciding when a bat survey is needed. The nature and location of this building and the works proposed to it do not suggest that there is a reasonable likelihood of an impact upon roosting bats, so I would not ask for a bat survey. Specifically this is a relatively modern building built between 1967 and 1975, and so is less likely to show features which allow bat access to the roof.

We can never totally rule out the possibility of bat presence, so we should attach an advisory note alerting the applicant to the fact that there is a low risk that bats may be present and advising them of what to do if bats are found during works.

I have no other comment other than to support the proposal to plant a Wild Cherry tree in the front garden.

Matt

Bat Advisory Note

Bats often roost in houses and other buildings, and work on these buildings may disturb a bat roost. All bats and their roosts are protected against disturbance under UK and European legislation. If works are planned on a building in which bats are roosting, Natural Resources Wales (NRW) must be contacted for advice.

If work has already commenced and bats are found, or if any evidence that bats are using the site as a roost is found, work should cease and NRW should be contacted immediately.

Where there is a likelihood that bats are present, or where bats are found to be present, a suitably qualified and experienced ecological consultant should be contracted to provide an assessment of the impact of the proposed works, and undertake bat surveys if necessary.

Where bats or their roosts are present, no works of site clearance, demolition or construction should take place unless a licence to disturb these species and/or their roosts has been granted in accordance with the relevant legislation. Otherwise, a prosecution may result.

NRW can be contacted at:-
