Description of Proposed Works

Please describe the proposed works

Installation of decking to the rear of the property.

The deck is to be constructed on an area that is currently a grass bank adjacent to the rear wall of the house. The finished deck level will be 300mm above ground level on the one side, and 2400mm on the other.

The deck finish will be dark brown to match the existing house windows / door frames. The exposed sides of the raised deck will be clad in the same decking material that forms the main deck.

Handrailing will be provided around the two elevated sides, with this being a steel finish.

To create a level base for construction of the decking support frame, the existing slope will be terraced with two short retaining walls c. 1m high each. This will also create storage room underneath the deck area, which will be accessed through a door to the side in the same finish as the rest of the decking area.
