

To Be Plans

All windows to be replaced in UPVC casement style, to retain the most original look :

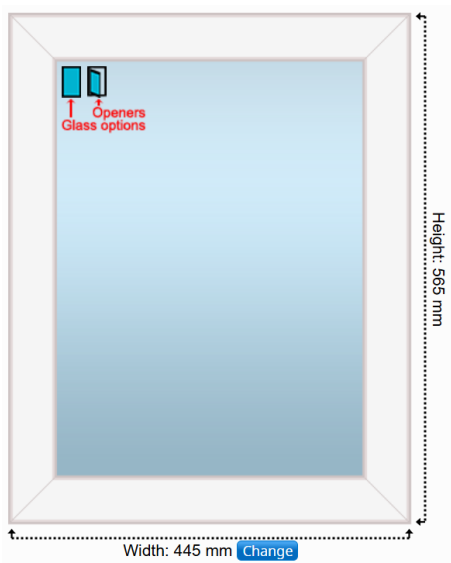

- Georgian bar will be placed in top panels with plain glass to the bottom – except for bathrooms which will have obscure glass.
- For the largest windows a central bar will be used in the bottom pain to retain as close to an original look as possible and enable fire safety openings.
- All openings will be outward and be fire safety compliant
- 1st and 2nd floor windows will be toughened safety glass

New window measurements and look:

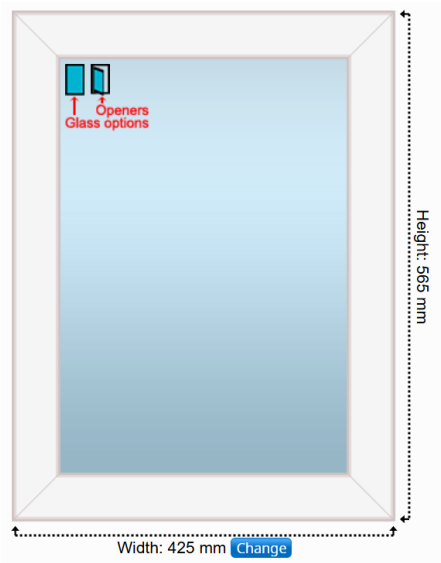

Window 1 – 2nd floor bedroom

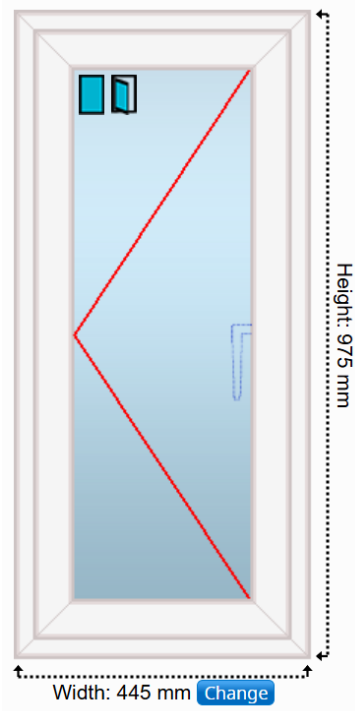

Window 2 – 1st Floor Bedroom with Bay (made up of multiple panels mostly fixed pane, openers are left and right bottom)

Left and right top pane

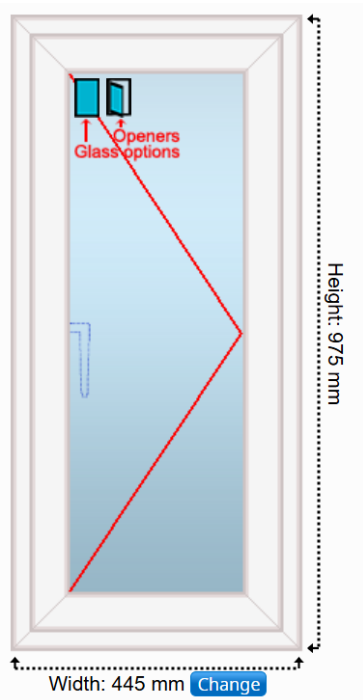

Middle top pane * 2
