Good morning i see that roman taxi office has submitted planning personal for a vechicle repair shop at the back of there office in maindee newport gwent I would like to oppose this on the grounds of no parking theres cars already pulling up all times of the day and night the noise pullotion of engines and the radio music system also the smell of fumes with engines running in a built up area and last but not least the smell of cigarette smoke and other substances coming from there with males already gathering as a meeting point the smoking in the office is bad enough but the rear garage is even worse please could you keep me anonymous but take this factors into consideration as if there granted the planning permission things will only get worse not better and ***** used a previous car garage as a base
