

metroSTOR PCH-Series Cycle Stores

The metroSTOR H-Series is defined by a flexible design platform, accommodating the maximum number of cycles within the available footprint. No compromise is made towards space efficiency, security or design features, enabling the H-Series to find customer-focused solutions to exterior cycle storage.

Our cycle hubs can be manufactured to accommodate the optimum number of cycles within the available footprint, with pre-engineered designs able to house up to 144 cycles safely and securely. Bespoke designs can accommodate any number of cycle spaces to fit customer requirements.

A choice in cladding density benefits the maintenance of clear lines of sight, an essential component for ensuring security and deterring cycle theft. The option for e-cycle charging points is an aid to renewable energy sources, whilst concurrently inhibiting the risk of a fire hazard caused by lithium batteries.

The H-Series feature a clean style that acts as a fitting complement to the urban street scene. Variable access control options further aid that sense of security, with effective rainwater run-off systems that ensure the long-term durability of our product. In addition, options for green roof provisions increase the potential for biodiversity, enhancing the environment our cycle stores are often placed in.

Cycle Rack Options

A choice of ST Cycle Stand, SV Semi-Vertical Cycle Racks or T2 Two-Tier Racks

Charging Points

Option for e-bike charging points

Pre-Engineered

Available with over 200 different pre-engineered units designed to house up to 144 cycles safely and securely

Green Roof

This option not only adds visual appeal but also benefits the environment by supporting biodiversity and promoting natural habitats for birds and insects.

Customise

A wide range of cladding options are available to select according to site use, architectural style and surrounding environment
