16 Priory Grove, Langstone, Newport, NP18 2NY.

Ecology Officer Consultation Response

As these properties are relatively new, the likelihood of bats roosting in the loft space is reduced, so there is no justification for asking for a bat survey on this occasion. However, we can never totally rule out the potential presence of bats, so we should attach out Bat Advisory Note as below to any consent granted.

Bat Advisory Note

Bats often roost in houses and other buildings, and work on these buildings may disturb a bat roost. All bats and their roosts are protected against disturbance under UK and European legislation. If works are planned on a building in which bats are roosting, Natural Resources Wales (NRW) must be contacted for advice.

If work has already commenced and bats are found, or if any evidence that bats are using the site as a roost is found, work should cease and NRW should be contacted immediately.

Where there is a likelihood that bats are present, or where bats are found to be present, a suitably qualified and experienced ecological consultant should be contracted to provide an assessment of the impact of the proposed works and undertake bat surveys if necessary.

Where bats or their roosts are present, no works of site clearance, demolition or construction should take place unless a licence to disturb these species and/or their roosts has been granted in accordance with the relevant legislation. Otherwise, a prosecution may result.

NRW can be contacted at:-

Natural Resources Wales, Tŷ Cambria, 29 Newport Road, Cardiff CF24 0TP, 0300 065 3000

Bat Conservation Trust can be contacted at:-

5th Floor, Quadrant House, 250 Kennington Lane, London, SE11 5DR, 0845 1300228
