Hi Lee,

Thanks for your payment, I have attached the reports for you.

JA0581A - Airsoft Weapon Acoustic Report – 250107

This report was generated because there is no existing measurement sound data for airsoft weapons and therefore, no base of reference for the worst-case example. Suitable data parameters were chosen that allow cross-referencing into an indoor environment that has been sound tested for performance using known guidance (ISO 140-4, ISO 717-2).
Summary in Section 5.3

JA0581B - Acoustic Survey Report – 250107

This report was generated because it compares known data parameters and criteria to the airsoft environment and assesses them against the 'General amenity' of the shopping centre.
Summary in Section 4.7

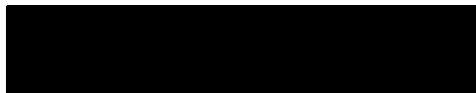

The acoustic survey and the assessment against known criteria suggest that the airsoft venue will not adversely affect the general amenity of the Kingsway Shopping Centre.

Please let me know if you or the local authority have any queries. I realise there is a lot of material to read so hopefully the summary in each report can help focus the results and analysis.

Kind Regards,

Andrew Regan *BSc (Hons), MSc, AMIOA, IOADip*
