Subject: RE: PP-09075588 Land To South Of Glan Usk Primary School Herbert Road Newport South Wales

Hi Lydia,

Please see the attached files which I believe should cover the requirements of the below. I've also had confirmation from the applicant that:

'The Gas measures under phase 1 were not seen to cause serious harm or concern so nothing was required from Terra Firma besides confirming the type of membrane we needed to use. This has all been signed off with NHBC and building control through site inspection during the build. Newport City council Building inspector was present.'

If any further information is required please let us know.

Thanks,

Liam Griffiths – Planner
