Dear Sirs

Planning application 25/0407– land at the former Uskmouth Power Station, Newport

We refer to the above application for 'removal of stored pulverized fuel ash (PFA) and the installation of a new battery energy storage system (BESS) with all associated drainage, infrastructure, engineering works and associated utilities connections' ('the application').

Risks from a BESS facility in this location

We have seen the Technical Response prepared by Pearl in response to our letter dated 26 June 2025. We do not propose to respond in detail and instead simply wish to state that we maintain our concerns as set out in our letter, which was submitted as an even-handed representation to allow the LPA to assess the application before it and the potential impact on the CCGT power station. We would be happy to assist LPA officers if they need any further input from us regarding the concerns raised in our letter.'

Yours sincerely,

A black rectangular redaction box covering the signature of Craig Scott.
