FAO: Emma Brinkworth

Dear Sir/Madam,

Re: Construction of a roof over the existing concrete dirty yard area.
Henton Farm, Henton Farm Road, Goldcliff, Newport
Pl.App.No: 25/1083

Thank you for notifying us of this application; consequently, we have reviewed the detailed information contained on your website and can confirm that archaeological mitigation is not required. We have reviewed the area against the information in the regional Historic Environment Record (HER) which shows as follows:

The works are within the Archaeologically Sensitive Area (ASA) of Newport. Henton Farm is possibly extant from 1565. Two sub-rectangular enclosures were found next to the farm and are of medieval origin. A review of the 1st – 3rd Edition (1883, 1901, 1920) historic Ordnance Survey maps show the footprint of the property. The proposal includes the construction of a roof over an existing hard-surfaced yard. The works are of small scale, and with our understanding of the historic environment, it is unlikely that significant archaeological features will be encountered or that existing features will be disturbed. Therefore, the potential impact is considered low.

As a result, there is unlikely to be an archaeological restraint to this proposed development and consequently, as the archaeological advisors to your Members, we have no objections to the positive determination of this application. The record is not definitive, however, and features may be disturbed during the course of the work. In this event, please contact this division of the Trust.

If you have any questions or require further advice on this matter, please do not hesitate to contact us.

Yours faithfully,

J. Dallimore
