Satellite Image Showing:

Evidence of Maintained Garden Area / Domestic Usage For >10 Years ago

	Proposed Annex / Lodge Site
	Agricultural Stock Fencing
	Access Gate To Agricultural Land
	Property Curtilage
	Pig Pen Area (Disused)

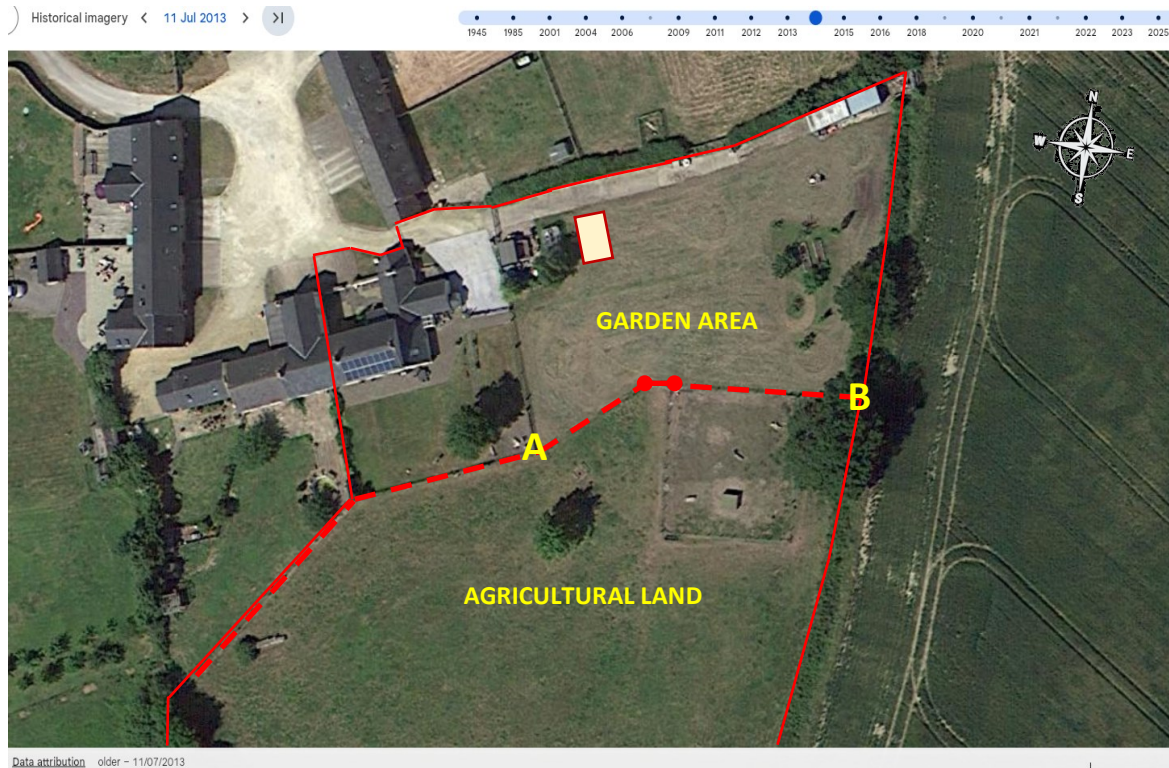

Note: Circa 2013 to present day, the Grass in the Garden Area has always been cut / well maintained and used for domestic use. This can be seen in this photo. Whilst SOUTH of the agricultural stock fence between "A" - "B" is Agricultural Land.

Evidence of Maintained Garden Area / Domestic Usage For >10 Years Land Usage Separation Boundary As Historically Defined

Looking West to East on this photo the dog-legged line drawn between post "A" and post "B" is what currently and historically, has separated and defined the Agricultural Land laying to the South and the Garden Area to the North of this Line, all within the curtilage of the property

These Fence Posts (Posts) are clearly shown by satellite imagery from 2013 (above) and remain in situ today, some 12 years later, and have determined the land separation and use type classification.
