Hi Both,

Hope you're well.

The ramp will have a Durbar tread finish throughout. This will provide a non-slip and self-draining surface that will be easily traversable by wheelchairs. I have attached an example image of this finish below.

The front steps will have the same Durbar tread finish but with yellow visibility nosings.

The handrail will be a 2-level handrail, with the top railing at 1000mm from the ramp and the secondary railing at 750mm from the ramp. The handrail will be powder coated in RAL 6005 Moss Green to match the existing railings on site.

I will attend site tomorrow to survey the neighbouring wall and use the information gathered to add the wall to the side elevations.

If you need any more information, please do not hesitate to ask.

Many thanks,
Sam
