

**APPLICATION NUMBER:** 25/1079

**PROPOSAL:** AGRICULTURAL DEVELOPMENT (CONCRETE WALLED SILAGE CLAMP AND ASSOCIATED DRAINAGE)

**SITE:** Ty Mawr Farm Lighthouse Road Newport NP10 8SF

**APPLICATION TYPE:** Prior notification

The proposal appears to be set away from public views and the link to the effluent tank appears to be on a boundary with no trees or hedges.

I am not clear whether prior notification applications should meet LDP GP5 vi:

“the proposal includes an appropriate landscape scheme which enhances the site and the wider context including green infrastructure and biodiversity networks”.

If yes, then some locally native tree/hedge planting should be secured at a suitable location.
