

HS40: Design risk management checklist

1 Introduction

Under the Construction Design and Management Regulations 2015, Designers are those, who, as part of a business, prepare or modify designs for a building, product or system relating to construction work. They have a duty to eliminate, reduce or control foreseeable risks that may arise during construction and the maintenance and use of the building once built. They also have a duty to provide information to other members of the project team to help them fulfil their duties. The Management of Health and Safety at Work Regulations 1999 require the principles of prevention detailed below, to be followed.

Contract/Job Name	Somerton Car Wash, Newport
Contract/Job Number	Garage Demolition, Cromwell Rd, Newport
Site Address	Somerton Park Garage, Cromwell Rd, Newport, Newport, NP19 0HT
Date	
Prepared By	
Signature	

Principles of prevention	Details/comments/examples of how achieved
Avoid risks where possible	

Evaluate those risks that cannot be avoided	
Put in place measures that control them at source	
Adapt the work to the individual. Especially regarding the choice of work equipment, and the choice of working and production methods, with a view to alleviating monotonous work, work at a pre-determined rate and to reduce their effect on health	
Adapt to technical progress	
Replace the dangerous with the non-dangerous or less dangerous	
Develop a coherent overall prevention policy which covers technology, organisation of work, working conditions, social relationships and the influence of factors relating to the working environment	
Give collective protective measures priority over individual protective measures	

Give appropriate instructions to employees and other operatives e.g. limb (b) workers
