Dear Sir,

I object to this planning as it is my understanding as a long term resident of the area, that the field was left in trust as a playing field not a football ground.

There is insufficient parking which is closed off for events that are run there so cars park in the surrounding narrow lanes. A couple of years ago when there was a football tournament on a fire engine failed to get through and had to do about a 12 point turn right next to our house onto our neighbors driveway (I have video footage) this could have lost lives!

The noise will increase and so no doubt will the foul language.

The structure proposed is out of keeping with the area and could be harmful to wildlife.

There is also the issue of safety as there is a lack of pavement to the one side of the field.

There is a constant smell of drugs being smoked in the area as it is and the two dugouts that are there have been vandalised and replaced several times over the years!

On these grounds I respectfully request that the planning permission be refused.

Yours faithfully
