

This is the same arrangement regardless if it's a Taxi office for General private hire or Home to school transport (school runs)

Either way drivers would have to visit for Maximum 10m for most importantly licensing compliance and collect payment.

Drivers and staff will have the same arrangement for parking as currently in our previous application.

I would like to note that it's the same arrangement what Prime Travel Solutions (Prime Taxis) and Newport travel solutions have in place with planning currently

Kind Regards

Good Morning,

I am evaluating the application at 130 Commercial Road for the taxi office. I note on the previous application it states; *In terms of the management of the payment system for the taxi drivers, the drivers will receive their pickup contact remotely, and drivers will keep a record on how many days they have driven to school pickups and will get paid the days they have worked. The applicant will send an invoice with the amount of days and the contract number to the Newport council/Licensing department (for school services) and the applicant will be paid into their Business account and then this will be available for taxi drivers to collect from the office. Drivers may also sign compliance documents for passenger transport and discuss any issues in the office face-to-face if deemed necessary. It was clarified by the applicant that no more than one driver will collect their payments or visit the office at one time and should last around 10 minutes. It was confirmed that they would park appropriately and safely. At no time is the dispatch office used as a taxi rank.*

Is this the same arrangement for the application under 25/0207?

Kind regards,

Marnie Ostler
