Subject: RE: Planning Re-Consultation Request for case ref: 26/0269

Vicky, a Bat Activity Survey Report version 1VA dated June 2026 has been submitted, and I support the methodology and conclusions of that report. No bats were detected, but a series of precautionary mitigation measures together with biodiversity enhancement measures are set out in sections 9 and 10 of that report. The implementation of these measures should be secured by planning condition. The rest of my comments from my original 19th May response remain unchanged.

Matt
