Letter Of Support

Business Cardiff Commercials (James)

We are a Cardiff-based commercial vehicle maintenance and repair company, and we have been working with SGM Waste for the past seven months, providing a wide range of services including diagnostics, electrical repairs, emergency roadside assistance, hydraulic repairs, mobile fitting, Moffett repairs, servicing and inspections, tail lift repairs, tanker repairs, truck washing and welding.

SGM Waste has quickly become one of our best customers, and the business they bring to us generates a significant amount of additional revenue. The level of work we receive from SGM is substantial and provides enough regular work to keep one of our technicians in full-time employment, with a consistently busy workload throughout the week.

Losing the work we receive from SGM Waste would have a significant financial impact on our business and would result in a considerable reduction in our workload. We genuinely enjoy working with SGM and have always found them to be a professional, fair and honest company.

We fully support SGM Waste's planning application and any opportunity for them to continue growing and developing their business. Their growth directly supports the growth of our own business and helps to sustain employment, while their continued expansion will create further jobs and opportunities within the wider local community.

We believe that supporting SGM's growth is positive for local businesses, employment and the economy, as well as being beneficial to the environment. Their commitment to responsible waste management and recycling gives us confidence that waste is being handled professionally, responsibly and in a way that benefits the wider community.

For these reasons, we are very pleased to give our full support to SGM Waste's planning application and hope that their continued growth is supported.
