Letter Of Support

Dragon Signs (Nathan)

I am writing on behalf of Dragon Signs in support of the planning application submitted by SGM Waste.

Dragon Signs has been supplying SGM Waste with a range of signage services for the past 12 months, including their company branding and logos, vehicle wrapping, and health and safety stickers and signage.

During this time, we have developed a very positive and valued working relationship with the company, particularly with George. SGM Waste is a valued customer of Dragon Signs, and the work they place with us provides an important contribution to our business.

Their continued growth and investment in their company generates additional work and revenue for Dragon Signs and helps us maintain a steady workload. Without their continued business, there would inevitably be an impact on our income and earnings.

We fully support SGM Waste's planning application and believe that supporting local businesses to grow and develop is important for the wider local economy. The continued success of SGM Waste will not only benefit their own business but will also have a positive knock-on effect for local companies such as ours that provide services to them.

We have always enjoyed a great working relationship with George and the team at SGM Waste. We are particularly pleased to see the company developing its operations and encourage the continued growth of the excellent work they are already carrying out within the waste and environmental sector. Their work

contributes positively to the environment and to the wider community, which is something we are proud to support.

For these reasons, Dragon Signs fully supports the planning application and hopes that the application is viewed favourably.

Yours faithfully

Nathan
