

1 Museum Street, Caerleon

Proposed change of roof covering from concrete tile to slate

1 Museum Street in Caerleon is within the Caerleon Conservation Area and therefore Planning Permission is necessary for a change of roof covering from concrete tiles to slates.

The concrete roof tiles are in poor condition. It is proposed to replace them with slates such as Marley Eternit Thrutone slates. Chimney flashings will be renewed.

Fascias and bargeboards will also be renewed.

The roof tiles on the rear lean-to will also be replaced with slates.
