Subject: Proposed construction of full size 3G sports pitch, spectator stands etc

Dear Mr Roberts

I wrote to you on the 2nd and 20th April 2026 objecting to the above proposed development at Dragon Park, Newport.

The reasons for my objection were clearly stated.

Now in support of my objections on parking issues, I attach a video of traffic parked on Traston on the weekend of 13th and 14th June 2026 due to a football event at Lliswerry High School.

Not only was the estate overwhelmed with vehicles, if that wasn't enough to contend with, they were parked illegally and dangerously, they were parked on corners, bends, across driveways, they were parked on pavements, with all 4 wheels on the pavement, crossing double yellow lines to do so, making it difficult and dangerous for pedestrians.

If the proposed development was to go ahead this would severely impact the lives of people living in Traston and the surrounding area and traffic and parking chaos would be a regular occurrence and as such my objections remain.

The organisers of the recent event even posted on Facebook advising people attending on the Sunday to allow extra time as the roundabout by Aldi could not cope with the volume of traffic and there had been severe delays on the Saturday.

I trust that this additional information will be included with the objections and concerns raised on this proposed development,

Yours faithfully
