Subject: 13/1279 AA Land to south of Glan Usk School, Herbert Road

Dear Geraint

Thank you for your email seeking the views of the Natural Resources Wales (NRW) on the appropriate assessment and associated conditions for the above application.

These comments are provided under Regulation 61 of the Habitats and Species Regulations 2010. We welcome the production of the appropriate assessment and agree with the content and conclusions and associated conditions. Provided the conditions are implemented NRW is of the opinion that adverse impacts on the River Usk SAC would be avoided.

However, as always Newport City Council (NCC) must assure itself that it has a high degree of confidence that any conditions set, or actions proposed, will both achieve the aim of avoiding adverse effects and will be implemented as specified.

Your sincerely

Angela Hunt  
Conservation Officer  
Cardiff & Newport

Hi Angela

See attached AA for land south of Glan Usk School (application 13/1279).

I have:

1. added 'screening bunds' to condition 19
2. checked condition numbers in the text
3. no change to condition 10(CEMP) - condition 10v specifically addresses lighting of the river front during construction and condition 10ix deals with other specific measure to protect the bank top.

If you can provide formal comment back I would be grateful.
