Hello Dylan

What I need to agree the discharge is an assurance that the East Usk route will only be used for indivisible loads that will not fit under the Turner Street bridge.

I'm afraid we will not be able to agree to a scenario where contractors are appointed who do not have vehicles that will fit under the bridge and default to the East Usk Route.

I'm afraid we can only allow deliveries via East Usk Road that cannot possibly use the Turner Street route.

Hello Carl,

Cars and most vans will clear the 3.1m bridge and will all therefore use Route A in order to access Herbert Road. Where lorries can be procured that have a cab height (including exhaust or other fixed protrusions) under 3.1m, their use will be maximised for supplying this development via Route A. This cannot always be achieved as some supplier fleets may have no vehicles under this height or

the goods being delivered may be un-demountable, in which case we would need to use Route B. We will, however, endeavour to secure lower vehicles whenever possible.

Regards,

Dylan

Define "as is reasonably practicable" as this looks open to abuse and so not acceptable.

Hello Geraint,

We confirm that deliveries for the project will be organised based on the use of vehicles/loads which will be low enough (under 3.1m high) to use Route A (Turner Street) as far as is reasonably practicable. Unavoidably higher loads will access the project using Route B (East Usk Rd). The vast majority of vehicles will use route A.

Regards,

Dylan

Hello Emma

It is essential that it is confirmed only indivisible loads greater than 3.1m high will use the East Usk route. We will not countenance the regular trafficking of construction vehicles via the East Usk route on the argument the vehicle chosen exceeds 3.1m in height when a lower vehicle could have been used and could have accessed the Turner Street route.

Dear Mr Morris

Please see the comments of the Council's Highways Section below. If you wish to respond to these comments please do so by 14/03/2017 in the first instance.

Having reviewed the delivery plan I am concerned that it does not prioritise the Turner Street / Herbert Road route. The East Usk Route should only be used for indivisible loads that will not fit under the Turner Street Bridge or when the Turner Street route is not available . If this could be made entirely clear I would be grateful. Equally deliveries should be via Herbert Road and internal haul road and not via the network of streets beyond Turner Street.

Geraint,

Track testing of the delivery routes will be required for both routes. Confirmation that the routes are also suitable for the height of delivery vehicles will be required. How will the size of delivery vehicle be controlled?

Deliveries must be timed outside of peak traffic and school arrival/departure times.

Carl Jones
