Subject: 26/0250

We would like to express our full support for the planning application 26/0250 re car parking Llanwern Village Hall.

1. The management committee has worked extremely hard to upgrade the Village Hall and encourage use of the building by residents of both the old village of Llanwern and the newly built estate thus providing a valuable communal meeting facility in the area.

2. Safe car parking is much needed as many childrens' birthday parties etc are held on Sundays. This coincides with the most consistently busy time at the Fifteen pub when visitors arrive for Sunday lunches. Without the proposed car parking being available a large number of cars are now found parked along Station Road and Cot Hill.

Potential and realistic dangers are then

a. Road Safety- people walking small children, pushing prams and pushchairs to the hall on what should be a 2 way road but has now become a busy single track means of travelling to the hall.

b. Difficulties with cars accessing and leaving the Fifteen pub car park to and from Station Road when visitors cars are already in situation.

3. Difficulties exiting and entering our drive at Copper Beech from our driveway when cars are parked opposite our entrance/exit.

4. Granting the application we feel will be a positive decision that will benefit residents and visitors in and around the area identified.

Many thanks Copper Beech Llanwern. NP18 2DS
