sensitive area you <u>must</u> progress to the EIA Screening Checklist. If it is <u>not</u> within a sensitive area, will the Development Project have the potential to cause environmental effects?	NO	☐	Screening not required. Record reasons for decision below:
--	-----------	--------------------------	--

The proposal will not have potential to cause environmental effects because:
 Due to the minor nature of the proposed development (including any demolition) over and above the full application which was subject to EIA screening and having regard to the location of the site in relation to sensitive areas, it is considered that the proposals that form part of this s73 would not have the potential for environmental effects and so did not need to be screened under the Environmental Impact Assessment Regulations.
