Hazels coppiced to hedge height

old hedgerow marks the boundary between two houses. There is a mixture of laurel and other species including hazel. The hazel has become overgrown now several feet above the rest of the hedge. We wish to coppice down to hedge height, as previously done, and repeat this coppicing cycle every 2-3 years or sooner.

Trees protected by TPO should be numbered according to the First Schedule of the Tree Preservation Order. For example - T3 oak; two beech and one birch in G2.

You must identify the trees on a sketch plan showing the location in relation to building(s), named roads and boundaries.

Please state the reference number you have given the plan (as described above):

Group 2

This section only needs to be completed if you are seeking consent for proposed works to trees under a Tree Preservation Order (TPO)

Please state the reasons for carrying out the proposed works on the tree(s):

The trees need to be maintained to ensure they stay healthy are safe in the unstable weather conditions, reduce the natural light restrictment as they growing out and reduce issues with telephone pole accessibility

A coppicing cycle carried out every 2-3 years or sooner will allow us to manage the hedgerow effectively

Removing any dead hazel stems will reduce risk of injury and reducing height reduces wind sail, also improving safety and maintaining the health of the stems.
