Good morning Lydia

I hope that you are well.

I am writing with regard to the above application for the replacement of fencing at Malpas Park Primary School.

I would like to request that if it is likely to be recommended that permission is granted then as ward councillor I would like to request that it is considered by committee.

The reason for this request is that the replacement fencing will have on residential amenity within the immediate vicinity of the surrounding area. There are a number of objections on the portal that have been submitted by residents and I have also been contacted by a number of residents who do not have internet access, voicing their concerns.

As such I would welcome the opportunity to make representation to committee on behalf of my residents and for planning committee to consider all aspects of this and make a determination.

Many thanks

Councillor Mudd
