Identification of Tree(s) and Description of Works

Before answering these questions you might find it helpful to consult a tree surgeon to clarify what needs to be done.

Please provide a full and clear description of:

- The proposed works
- The trees affected including species and location

Minimal pruning possible of a number of trees to enable a clear line of sight to be established from the telegraph pole at the roadside (refer to Easting, Northing) to the telegraph pole on our property 59A Fields Park Road. This is to re-establish an ariel broadband line that was brought down. The majority of pruning is expected to be through Laurel. However there are Sycamore, Ash, Horse Chestnut and Lime trees in the approximate line of site needed that may require pruning. We intend to use Hywel Jones who will liaise with BT Openreach to minimise the impact to any trees.

Trees with known TPOs that may require pruning are:

Sycamore tree listed as T10 on TPO 04/1979 (this is located directly to the right of west of the roadside telegraph pole).

Horse Chestnut (2 off) listed as G2 on TPO 04/1979

Lime tree listed as T3 on TPO 06/1982

Trees protected by Tree Preservation Order should be numbered according to the First Schedule of the Tree Preservation Order. For example - T3 oak; two beech and one birch in G2.

You must identify the trees on a sketch plan showing the location in relation to building(s), named roads and boundaries.

Please state the reference you have given the plan (as described above)

Site Plan Tree Pruning 202606.pdf

Your plan needs to show the precise location of the tree(s) in relation to nearby property/roads/boundaries. It should, therefore:

- indicate the main features of the site where the tree(s) stand and its surroundings; in particular, you should:
 - mark and name surrounding roads
 - sketch in buildings, including adjoining properties
 - add house numbers or names
- mark the position of the tree(s) to which you want to carry out work
- identify them by the number shown in the Tree Preservation Order where possible; if you use a different number, please make sure that this can be matched with your description of the tree(s)
- if there are many trees on the site, make clear which tree(s) are included in this application by:
 - marking all trees on the plan, but only numbering those to which you want to carry out work
 - showing the approximate distance between the application tree(s) and buildings
 - adding other relevant features on the site (e.g. greenhouse, paths)

If it is impossible to identify the tree(s) accurately on the plan (e.g. because they are part of a woodland or group of trees), please identify their approximate location on the plan and provide details of how the tree(s) are marked on site (e.g. high visibility tape, tree tags, paint, etc); trees must not be marked by scarring or cutting into the bark.

Trees - Reason(s) for work(s)

Please state the reasons for carrying out the proposed works on the tree(s)

BT Openreach have stated they require a line of site to be re-established between the telegraph pole next to their roadside cabinet and the telegraph pole on our property (59A Fields Park Road), before they can re-establish the aerial aerial telecoms cabling (and hence broadband) which had been brought down due to fallen tree limb. Only the minimum pruning necessary to satisfy BT Openreach's need for line of site to be established is required.

Easting, Northing of telegraph poles:

Telegraph pole location - 329859, 188121 (roadside)

Telegraph pole location - 329857, 188051 (within boundary of 59A Field Park Road)

Do your reasons for carrying out the proposed works include any of the following

Health or safety of the tree(s) - e.g. it is diseased, fears that it might break or fall

☐ Yes

☒ No

Alleged subsidence damage

☐ Yes

☒ No

Trees - Additional Information

Are you providing additional information in support of your application?
