

Site Boundary

Existing established hedging provides visual screening from proposed menage.

Menage has been positioned to avoid RPA of two established trees along the west boundary of the site. Approximate RPA indicated in dashed line.

Perennial planting to border of menage.

Access gate for horses and maintenance tractor.

Menage to have timber post and rail fencing to perimeter.

Proposed menage to have Silica Sand surface with sythetic fibres.

Proposed hedge planting to east elevation of menage to provide additional screening from road.

Drainage to arena to drain to soakaway. To be installed to adjacent field.
