scale bar 1:100

1. Tarmac on the crossing to be thoroughly compacted, smoothed off to required levels and to be finished neatly with an approved pattern vibrating roller.
2. Should the kerb face at the crossing be greater than 125mm, a 600mm wide tarmacadam ramp should be used.
3. All stop cocks, valves, hydrants etc. to be raised, lowered to new level and protected during works.
4. The whole of the works to be carried out in accordance with this drawing and shall be to the satisfaction of the Group Leader of Highways Development Control.

LIGHT VEHICULAR ACCESS OVER A FOOTPATH IN MACADAM
