

Tree and landscaping 5 year plan.

Year 1

Identify the soil type & drainage

Remove weeds/vegetation that will compete with plants

Plant hedging in a staggered row with correct spacing

Plant between nov-march

Add protective tubing & stakes for protection against wildlife

Year 2

Continue weed & vegetation control

Replace any losses from year 1

Adjust tubing & stakes to suit

Year 3

Continue weed & vegetation control

Inspect tubing & stakes

Light pruning

Year 4

Continue weed & vegetation control

Remove tubing & stakes once trees are stable

Year 5

Selection pruning if needed

Hedge trimming every 2 years
