Dear Sir/Madam

Planning Application – Proposed light grey powder coated metal louvre screens and kitchen roof plant, Tredegar Park Lodge, Cardiff Road, Newport, NP10 8TF

Thank you for your letter of 7 August inviting our comments on the information submitted for the above planning application.

Advice

This response is based on the advice provided by Cadw's Senior Historic Environment Planning Officer.

We consider that the application is inadequately documented and we recommend that additional information is required to enable a balanced decision to be taken against Planning Policy Wales, Technical Advice Note 24 Historic Environment and associated guidance. Full details of the additional information that is required are explained in the below assessment.

The national policy and Cadw's role in planning are set out in Annex A.

Assessment

This advice is given in response to a planning application for louvre screens and kitchen roof plant at Tredegar Park Lodge, Newport

Registered Park and Garden**PGW(Gt)48(NPT) Tredegar Park**

The application area is inside the boundaries of the registered Tredegar Park historic park and garden but no information on the impact of the proposed development on this designated historic asset has been submitted. This will be a material consideration in the determination of this application (see Planning Policy Wales 2024, section 6.1.19): However, as no information on this issue has been submitted with the application, we are currently not in a position to provide your Authority with advice.

Consequently, your Authority should request more information on this issue to be provided. This will require an assessment of the impact of the proposed development on the registered Tredegar Park historic park and garden to be prepared by a competent and qualified historic environment expert. In preparing this assessment, the expert should consider the advice given in the Welsh Government document “Managing Change to Registered Historic Parks & Gardens in Wales” and may find following the procedures outlined in Welsh Government document “Heritage Impact Assessment in Wales” helpful.

Once this assessment has been submitted, Cadw should be reconsulted on this application.

Yours sincerely,

Laura Cooper
Historic Environment Inspectorate / Arolygiaeth yr Amgylchedd Hanesyddol

Annex A

Our role

Our statutory role in the planning process is to provide the local planning authority with an assessment concerned with the likely impact that the proposal will have on scheduled monuments, registered historic parks and gardens, registered historic landscapes where an Environmental Impact Assessment is required and development likely to have an impact on the outstanding universal value of a World Heritage Site. We do not provide an assessment of the likely impact of the development on listed buildings or conservation areas, as these are matters for the local authority.

It is for the local planning authority to weigh our assessment against all the other material considerations in determining whether to approve planning permission.

National Policy

Applications for planning permission are considered in light of the Welsh Government's land use planning policy and guidance contained in Planning Policy Wales (PPW), Technical Advice Notes and related guidance.

PPW [Planning Policy Wales - Edition 12](#) explains that it is important that the planning system looks to protect, conserve and enhance the significance of historic assets. This will include consideration of the setting of an historic asset which might extend beyond its curtilage. Any change that impacts on an historic asset or its setting should be managed in a sensitive and sustainable way.

The conservation of archaeological remains and their settings is a material consideration in determining a planning application, whether those remains are a scheduled monument or not. Where nationally important archaeological remains are likely to be affected by proposed development, there should be a presumption in favour of their physical protection in situ. It will only be in exceptional circumstances that planning permission will be granted if development would result in a direct adverse impact on a scheduled monument (or an archaeological site shown to be of national importance)

[Technical Advice Note 24: The Historic Environment](#) elaborates by explaining that when considering development proposals that affect scheduled monuments or other nationally important archaeological remains, there should be a presumption in favour of their physical preservation in situ, i.e. a presumption against proposals which would involve significant alteration or cause damage, or would have a significant adverse impact causing harm within the setting of the remains.

Historic Parks and Gardens

PPW also explains that local authorities should value, protect, conserve and enhance the special interests of parks and gardens and their settings included on the register of historic parks and gardens in Wales and that the effect of a proposed development on a registered park or garden or its setting should be a material consideration in the determination of a planning application.
