

With regards to the biodiversity enhancement scheme for the 2 applications Ref. No: 24/1040 & 24/0734, I hope the following meets your requirements for the discharge of application.

1. 2 nest boxes facing northerly on a wooden post.
2. A dead wood area between the garage and the boundary hedge approximately 4 square meters and 0.2M deep for saproxylic species.
3. I will also plant a border in autumn of: All Things Bright and Beautiful Bee & Butterfly Wildflower Seeds LWBP 100%

The species included in this mixture create an attractive display from May to October and is suitable for creating habitats for bees, butterflies and other pollinating insects. It contains a wide range of species to create a diverse environment and range of food to support local wildlife.

Attached are pictures of the dead wood area and the installed 2 nest boxes.

Kind regards,

George
