

The image contains two architectural drawings of a building facade. The top drawing is a perspective view of a two-story building. It features a prominent gabled roof on the left side, which is supported by a series of vertical posts. The building has several windows, including a large multi-paned window on the ground floor and smaller windows on the upper floor. The right side of the building shows a continuation of the facade with more windows and a small entrance area. The bottom drawing is a cross-section of the building, showing the internal structure. It illustrates the roofline, the floor levels, and the internal walls. The drawing shows a series of vertical supports and horizontal beams, indicating the structural layout of the building. The cross-section also shows the placement of windows and doors, providing a clear view of the internal space and the relationship between the different levels of the building.

Side elevation

This architectural drawing shows the exterior of the building from a side elevation. The building features a gabled roof with a chimney on the left side. The exterior walls are clad in vertical siding. There are two small, square windows on the left wall. A small porch with a gabled roof is located on the right side of the building. The drawing is a black and white line drawing with some shading to indicate depth and form.

This architectural drawing shows a cross-section of a building. A large, cantilevered structure, possibly a roof or a large overhang, extends from the main building mass. The structure is supported by a thick wall on the left. Below the main structure, there are smaller, more complex details, including what appears to be a staircase or a series of steps leading up to the main level. The drawing is a technical line drawing, typical of architectural plans.

SMOKE AND HEAT DETECTION SYSTEM
All three floors are to be provided with a mains operated interconnected smoke and heat detection sensors to BS5446 and installed in accordance with BS5446-6:2004 recommendations of BS5446-6:2004. Self contained mains operated smoke alarms are shown thus SD on a smoke detector in the ground floor kitchen shown thus SD on the floor plan. All doors have battery backup and are to be fitted at ceiling levels in all circulation areas on each floor within 3.5m of all doors to habitable rooms. All existing doors shown thus  are to either be modified to be self-closing or fitted with resistance with self-closer and 25mm doorstops or replaced with standard P30 self-closing doors

Revisions

Revision A June 2026)
Existing first floor bedroom added to
front elevation.
Roof pitch of proposed side elevation
amended.

Revision B August 2026
Note relating to the position of the
boundary on completion of both
extensions added. Roof lantern added

Alterations and extensions
