Dear Sir

Response to Application No.25/0337 – Proposed demolition of existing sheds and construction of a new shed for chickens – OPPOSED

The proposed shed sized 7m x 3m x ?? - with only Greenmeadow Avenue separating my garden and a shed this sized - would feel very intrusive.

How many birds would you estimate in a shed of this size? Because although I quite like the sound of birds, chicks and cockerels included, but on this scale, in a back garden would be not be a “pet” sort of size. A shed this size would only be indicated for a commercial purpose.

I should also like to know what precautions there would be to prevent an infestation of rats, which are already a huge problem without adding to the number.

For these reasons, I **oppose** this proposal.

Yours faithfully
