

With regard to the above and in conjunction with my existing comment posted 25/07/25 the contents of which I still wish to be considered.

The NMA drawing clearly shows that the patio has been built out further than originally consented to which supports the details included in my comment.

The overall measurement of the extension and patio is shown as 9 metres whereas on the superseded drawing it is shown as 6.9 metres this is clearly 2.1 metres further than previously proposed.

Even compared to the original planning application in which the overall measurement of extension and patio is 7.88 metres it is still 1.12 metres further.

I would respectfully suggest that this is a material change and should be considered as such.

Kind regards
