Overall, from the information provided and previous planning history, whilst it is understood that the applicant owns the land, it currently does not fall within the residential curtilage of the applicant, and therefore, any subsequent application would need to also apply for a change of use in the land. While the current submission includes limited supporting information, the retention of part of the existing lawn is viewed positively in terms of maintaining visual amenity within the streetscene. Further details regarding the proposed hardstanding materials and additional information about existing trees will be important in informing the design. A Green Infrastructure Statement, replanting scheme and a Biodiversity Enhancement Scheme should be submitted as part of the full application. Additionally, it is advisable to consult Welsh Water to determine whether the presence of a drain at the kerbside may present any constraints to the proposal.
