Of these suggested locations, location SS5 is the preferred option. This location is at the end of a cul de sac fronting the 'Avenue' in the south west corner of Phase 4A adjacent to a LEAP. The sub-station would be set back from the Avenue but would be adjacent to a footway link and visible from adjacent plots, mainly Plots 241-243. However there is scope for landscaping around the proposed sub-station whilst leaving it readily accessible for maintenance purposes.

The enclosures for such infrastructure are prosaic and ideally a higher quality enclosure should be achieved. This for example is the sub-station on Phase 1 next to a well-used pedestrian / cycle route and near the central 'square' of that phase (51.575768464011794, -2.9351064484585843):
